

## Gateron Lanes – 51000 Actuations

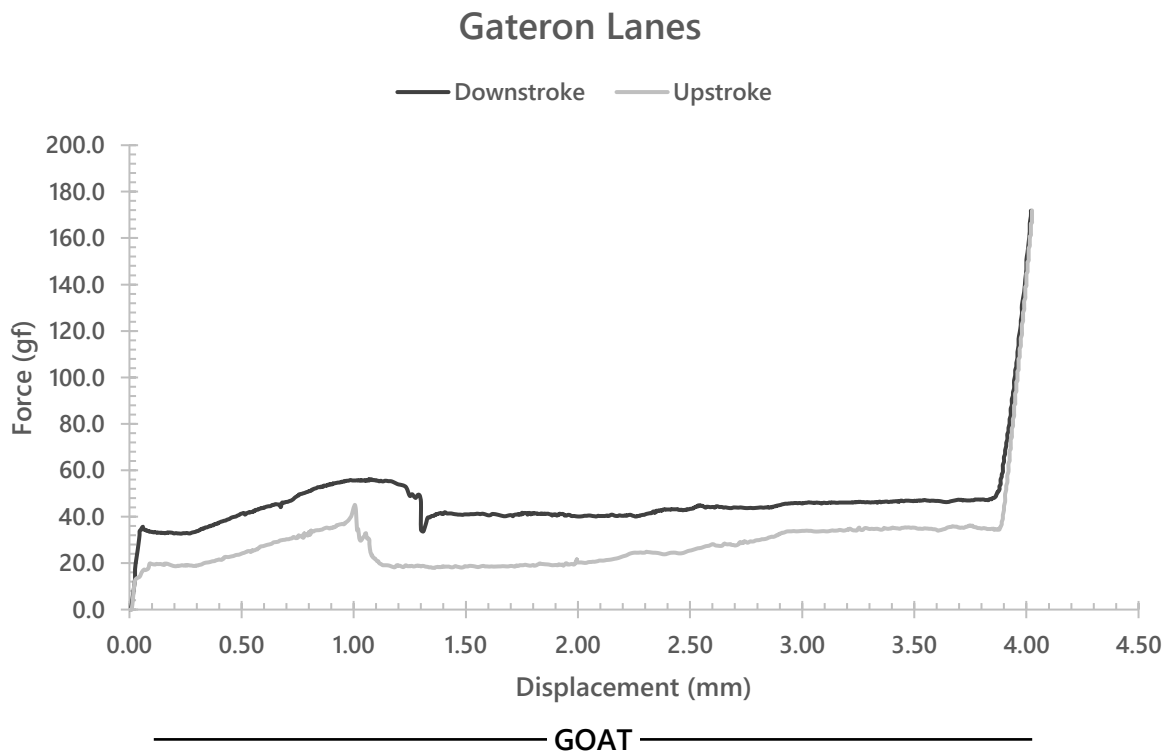

Last Update: 09/14/2025

Gateron Lanes	
Switch Type: Tactile	Gateron
Total Stem Travel	3.845 mm
Peak Force	56.2 gf
Bottom Out Force	47.8 gf
# of Upstroke Points	824
# of Downstroke Points	943

### Testing Notes

- These switches have unusual force curves for tactiles as they're produced through the use of a leaf mechanism that is equally as uncommon to see in MX footprint switches. Similar switch mechanisms from modern switches – like Melodics or Zeal's 3-in-1 Clickiez – also produce curves like these.
